DETAILED ACTION

The response filed January 26, 2005 has been entered.

Claims 1-4 are pending in the instant application.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on January 26, 2005 has been entered.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the

Art Unit: 1632

conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-3 of copending Application No. 09/569,259. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed method of converting a neural stem cell into a ventral neuron is obvious over the claimed neural stem cell of 09/569,259.

Claims 1-4 of the instant application are directed to a method of converting a neural stem cell into a ventral neuron, which comprises introducing into the neural stem cell, *ex vivo*, a nucleic acid which encodes homeodomain transcription factor Nkx6.1 protein, wherein the encoded protein is expressed in the stem cell so as to thereby convert the neural stem cell into the ventral neuron.

Claim 1 of parent case 09/569,259 is directed to a neural stem cell which does not express homeodomain transcription factor Irx3 protein or homeodomain transcription factor Nkx2.2 protein comprising a retroviral expression system, wherein the retroviral expression system expresses homeodomain transcription factor Nkx6.1 protein.

The instantly claimed method of converting a neural stem cell into a ventral neuron is obvious over the neural stem cell because the claimed method is essentially a method of making the neural stem cell of Claim 1 of parent case 09/569,259. Once the genetically modified neural stem cell is produced, expression of the Nkx6.1 protein converts the neural stem cell into a ventral neuron, according to the claimed method.

Although parent case 09/569,259 contains a restriction requirement, claims directed to the neural stem cell and a method of generating a motor neuron by introducing an Nkx6.1 gene into a neural stem

Art Unit: 1632

cell were not restricted apart. Both the neural stem cell and the method were included in the invention of Group I.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

No claims are allowable.
